CSA-COMPLIANT DESIGN STANDARDS

High-visibility safety apparel (HVSA) must meet the following criteria:

- Stripes/bands are a minimum width of 50 mm.
- A horizontal stripe/band must encircle the torso at or near the waist.
- Two vertical stripes must be present on the front, passing over the shoulders and forming a symmetrical "X" on the back, extending to the waist.
- Class 1 apparel must include a minimum of 0.14 m² of background material.
- Class 2 and Class 3 apparel require full coverage of background material on the torso, with Class 3 providing additional visibility through (at minimum) stripes/bands encircling both arms and both legs.
- Background material may be fluorescent yellow-green, orange-red, or other approved high-visibility fluorescent colours as specified by the standard.

FLUORESCENT VS. RETROREFLECTIVE MATERIALS

Fluorescent fabrics are designed for daytime visibility—they appear extremely bright because they absorb natural sunlight and re-emit it, making the wearer stand out.

Retroreflective materials are essential for low-light and nighttime visibility. These materials use specialized surfaces to reflect light (such as vehicle headlights) back toward its source.

Together, as required by CSA standards, these materials provide 24-hour visibility: fluorescent for daytime conspicuity and retroreflective for visibility when illuminated in the dark.

CSA HI-VISIBILITY GARMENT CLASSES

CLASS 1

Style Type: Harness, or Non-hi-vis material with combined-performance or retroreflective stripe/bands; limited body coverage

Situation Examples (Low): vehicles not exceeding 40 km/h, ample separation between workers (on foot) and traffic/mobile equipment

Job Examples: parking locations, right-of-way maintenance, warehouse, shipping/receiving

CLASS 2

Style Type: Hi-Vis material with combined-performance or retroreflective stripe/bands; partial body coverage

Situation Examples (Moderate): vehicles moving 40-80 km/h, inclement weather or low-light, workers in closer proximity to vehicles

Job Examples: construction, manufacturing, airport ground crews, emergency responders

CLASS 3

Style Type: Hi-Vis material with combined-performance or retroreflective stripe/bands; full body coverage (or, at minimum stripes/bands encircling both arms/legs with full torso coverage)

Situation Examples (High): vehicles exceeding 80 km/h, low-light or nighttime activities

Job Examples: roadway construction, utility, emergency responders, roadside assistance

LOW RISK

MODERATE RISK

HIGH RISK

Examples shown are intended for illustrative purposes and may not reflect all combinations of CSA class options, or risk situations.

DAKOTA
WORKPRO SERIES

MEN'S HI-VIS WATER REPELLENT HOODED QUILT SHIRT JACKET, CLASS 2

- 125 g. PU coated polyester microfibre shell

Join the SAFETY REVOLUTION

The Future of Hi-Visibility Workwear

Partner with Mark's Commercial to raise your safety standards. Our private-label workwear combines VizLite® DT with CSA-grade hi-visibility performance.

Why Use VizLite® DT?

- ▶ Adds a third level of protection by enhancing visibility in low-light and no-light conditions
- ▶ Charges by UV light in as little as 5–10 minutes
- ▶ Provides up to 8 hours of visibility on a single charge
- ▶ No batteries required
- ▶ Visible from over 200 meters in low-light and no-light conditions
- ▶ Multiple award-winner for innovation in safety apparel
- ▶ Certified to meet or exceed global safety standards
- ▶ Performs in extreme conditions: -30°C and underwater
- ▶ No ongoing maintenance: with no mechanical or electrical parts, VizLite® is always ready to use
- ▶ Easy garment care: launder on the garment with no special washing requirements

3 Levels of Visibility

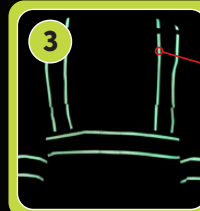

FLUORESCENCE

Base fabrics for daytime conspicuity

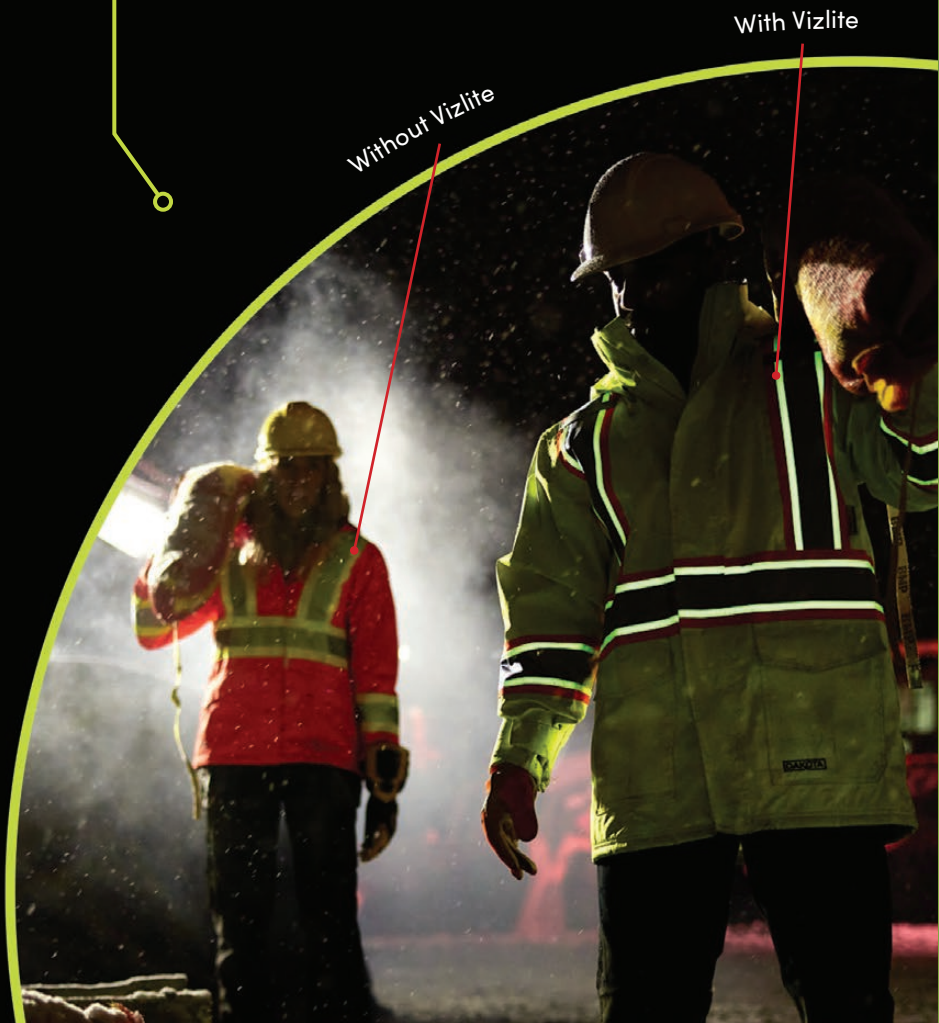

RETROREFLECTIVE

Reflective fabric reflects light back to the source

PHOSPHORESCENCE

Absorbs UV light and re-emits it as an afterglow
