3 CONVENIENT WAYS TO SHOP FOR COMPANY WORKWEAR AND FOOTWEAR

It's never been easier for company employees to purchase industrial footwear at your favorite Mark's store.

CLIENT SAVINGS CARD

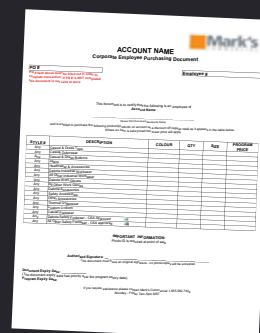

Show the card at any Mark's store to receive your specified discount for a variety of store items shown on the card.

These cards are re-useable and valid until the expiry date found at the bottom of the card. The card must be presented for discounts to be applied against regular priced items. In the event of an item being sale priced, the lower price will apply.

CLIENT VOUCHER

Simply show the voucher at any Mark's store to receive the specified discount shown for a variety of store items listed on the voucher.

The voucher must be shown for discounts to be applied against regular priced items. In the event of an item being sale priced, the lower price will apply.

CLIENT INDUSTRIAL FOOTWEAR PURCHASING CARD

Our new footwear purchasing card contains all the benefits of the voucher combined with a more flexible client reporting experience and easier in-store purchasing.

The card is only to be used on industrial footwear.

WE MAKE PROFESSIONAL GRADE GEAR TO HELP PEOPLE STAY AND FEEL ALIVE

Founded in Norway in 1877, Helly Hansen continues to develop professional-grade gear that helps people stay and feel alive. Through insights drawn from living and working in the world's harshest environments, the company has developed a long list of first-to-market innovations, including the first supple waterproof fabrics over 140 years ago.

Other breakthroughs include the first fleece fabrics in the 1960s, the first technical base layers in the 1970s, made with Lifa® Stay Dry Technology, the waterproof and breathable solution, HELLY TECH®, launched in the 1980's, and today's LifaLoft™ technology, an insulation revolution that will keep you warmer with less weight and bulk compared to traditional polyester insulation.

It's a tough job. *What keeps you going?*

Leo worked for moments like this... *you* work so your employees can have more moments like this.

Leo was a big strong man with a booming voice, but he didn't hesitate to push his daughter's stroller through the park or get on the floor to play cars with his son. To provide for his family, he worked for a paving company.

The family lost its cornerstone the day Leo didn't come home from work.

Learn more about Leo's family at threadsoflife.ca/erin/

We care as much about health and safety as you do. We support families like Leo's after the worst happens: an on-the-job fatality, serious injury or occupational disease.

You can help turn workplace tragedy into hope:

Spread the word — Build Threads of Life into your emergency response and EAP programs. Let those who need help know where to find it: www.threadsoflife.ca.

Get involved — Our members share their stories to help prevent future tragedy. Book a Threads of Life speaker for your health and safety day: www.threadsoflife.ca/speakers.

Designate and donate — Make Threads of Life your company's Charity of Choice. Your company's contributions will directly support Canadian families affected by workplace fatalities, life-altering injuries and occupational disease — visit www.threadsoflife.ca/donate

Association for Workplace Tragedy Family Support

Helping you prevent workplace tragedy. Helping victims of tragedy heal.

HI-VISIBILITY WORK WEAR

CSA Z96 Standards Explained

CSA Class 1

Apparel consists of a basic harness or stripes/bands over the shoulders and encircling the waist. The center portion of the torso bands between the two vertical bands is optional.

CSA Class 2

Provides wearer with more visibility than Class 1. Apparel has full coverage of the upper torso (front, back, sides and over the shoulders) and includes bib-style overalls. Stripes/bands are composed of retroreflective or combined performance materials.

CSA Class 3

Provides the greatest visibility for the wearer under poor light conditions and at great distances. Apparel meets the same requirements as Class 2 with the addition of bands around both arms and legs. These bands are made up of combined performance stripes/bands or a combination of retroreflective and background material.

the difference is like day & VizLite™

With the long winter nights soon approaching, it's important that workers be easily seen both day and night. Wearing industrial workwear using VizLite™ Dual Technology is a smart choice because it combines phosphorescent and reflective technologies to let you be seen at greater distances than using traditional high visibility garments.

VizLite™ Dual Technology phosphorescence offers a third level of protection, when there is low light or no light, by giving off an intense glow for up to 8 hours, without the use of batteries. VizLite™ Dual Technology phosphorescence is charged by ultraviolet light after five to ten minutes of exposure.

There is a range of VizLite™ Dual Technology products to meet the needs of the global safety market.

VizLite™ DT
Domestic wash phosphorescent material
 VizLite® reflective tapes (10mm and 50mm width) are stitchable and suitable for mid weight and heavy weight fabrics. The DT material is suitable for embroidering and screen printing to produce identity badges and logos.

VizLite™ DT HA
Heat applied phosphorescent film
 VizLite® DT HA is a phosphorescent and reflective heat applied film incorporating a layer of microscopic phosphorescent technology glass beads that offers an innovative solution to garment branding.

VizLite™ DT 7050
Polycotton based phosphorescent material with reflective tape
 VizLite® DT 7050 tapes are certified to meet the EN 20471:2013, ANSI 107:2010 and can be used as retro-reflective material on garments which are to be certified to those standards.

Certified to meet and exceed global standards including the areas of Photo Luminescence, FR Protection, Antistatic, Arc Protection, ANSI 107 and ISO20471 High Visibility, Oeko-Tex with testing undertaken at SATRA, BTGG, ArcWear, UL, Centrocot, VTEC Laboratories Inc. and Shirley Technologies. Compliant with CSA Z96-15 Class 1 & 2, Level 2. BC MOT Safety Apparel.

Innovations Explained

RAIN DEFENDER®

Amazingly durable and dependably water repellent, moisture beads up and rolls off. Rain Defender® Durable Water Repellent.

FULL SWING®

Looks traditional, feels exceptional. Engineered design provides stretch without bulk and every element works with you so you can work easier. Classic Carhartt engineered for maximum range of motion.

RUGGED FLEX®

Is gear that is made to move in, so whatever you're doing, it's easier to do. Rugged Flex® is stretch technology that's made for ease of movement. The Rugged Flex® designation is given to materials that meet Carhartt's defined standards for stretch and recovery.

STORM DEFENDER®

Gear with a waterproof, breathable membrane and waterproof seams. Storm Defender® Waterproof Breathable protection.

HYPER-DRI HD3®

Waterproof & breathable – Our best water protection. A waterproof barrier is laminated to the underside of the outer fabric and a durable water repellent (DWR) treatment is applied on the outside of our casual and industrial clothing and accessories. Waterproof zippers and all seams are sealed to keep you and your valuables dry.

T-MAX®

Maximum warmth and superior comfort. T-MAX® insulation is a lightweight insulation in our clothing, shoes, boots and accessories that provides warmth without the bulk and allows moisture to move away from the body to help regulate your body temperature. Keeping you warm, dry and comfortable.

FLEXTECH®

Specialty fabric with excellent stretch and long-lasting shape, ensuring that our casual and industrial clothing feels comfortable and will retain its shape throughout its lifetime. Our FLEXTECH® WAISTBAND in men's pants is an integrated elastic that allows the waistband to expand as needed, providing a custom and comfortable fit.

STAIN REJECTOR®

STAIN REJECTOR® fabrics are used in our men's pants to repel liquid so spills instantly bead up and wipe off without leaving a mark.

MIMIX®

Utilize a patented, science-based design featuring lightweight stretch panels that improve overall mobility and increase breathability for all-day comfort.

TOUCH-TEX™

Superior color retention, soil release and wickability. TOUCH-TEX PRO™ has the same features as Touchtex™ but with an even softer hand.

HELLY TECH® FABRIC

Helly Tech® is constructed with Polymer Polyurethane (PU) based membranes and coating technologies. The PU membrane gives softness and stretch to the fabric, while the coating allows waterproofness and breathable qualities. Helly Tech® is made either with Hydrophilic barrier membranes or Microporous membranes, depending on the end-use purpose of the fabric.

LIFALOFT™

Developed in cooperation with Primaloft®, LIFALOFT™ is a combination of LIFA®'s unique insulation structure and Primaloft®'s extensive knowledge in synthetic insulation.

With increased warmth, lightweight insulation and superior moisture management properties. LIFALOFT™ technology is an insulation revolution that will keep you warmer with less weight and bulk compared to traditional polyester insulation.

PRIMALOFT™

Primaloft® is a synthetic insulation technology, offering superior thermal properties with excellent water repellency. It is made up of ultra-fine fibers that form air pockets to trap heat inside. Additional feature of the ultra-fine fiber is super softness.

CORDURA®

Designed for living and built to last, the original durable CORDURA® fabric that has excellent resistance to abrasion and excellent tear strength, has proven performance in many of the world's toughest environments. Made with 100% high tenacity air jet textured nylon 6,6 filament yarns in a range of sizes.

RIPSTOP

Ripstop fabrics are woven fabrics, often made of nylon, using a special reinforcing technique that makes them resistant to tearing and ripping. During weaving, (thick) reinforcement yarns are interwoven at regular intervals in a crosshatch pattern. Thin and lightweight ripstop fabrics have a 2-dimensional structure due to the thicker yarns being interwoven in thinner cloth. Advantages of ripstop are the favourable strength-to-weight ratio and that small tears can not easily spread.

BACK

WOMEN'S HI-VIS TRICO POLY INTERLOCK SAFETY VEST with ZIPPER CLOSURE

FEATURES

- 100% Polyester Tricot.
- Specially tailored with the woman worker in mind.

A man and a woman are standing outdoors in front of a brick wall. The man, on the left, is wearing a grey zip-up jacket and black pants, smiling and looking towards the woman. The woman, on the right, is wearing a dark grey zip-up jacket and dark pants, smiling broadly at the camera. She has her hand on the man's shoulder. The background is a red brick wall with some greenery on the left.
