

TRANSPORTATION

A woman with long dark hair, smiling, wearing a grey zip-up jacket over a grey collared shirt. To her right, a man in a tan short-sleeved uniform shirt and a dark blue baseball cap is smiling while driving a truck. The background shows the interior of the truck and a glimpse of the outside world through the window.

DAKOTA VIZLITE™ DT

Dakota VizLite™ DT (Dual Technology) garments combine two technologies: retro-reflectivity and photoluminescence.

THREE LEVELS OF PROTECTION

1. Fluorescent background colours keep the wearer visible in well lit environments or daylight.
2. Retro-reflectivity: Strips of reflective material on the garment that contain microscopic glass beads that act as light reflectors, reflecting light back to its original source (such as car headlights).
3. Photoluminescence: VizLite™ tape contains photoluminescent crystals that absorb ultraviolet (UV) energy that is then emitted as a light source in low or zero-light conditions. Basically, it glows in the dark.

Features & Benefits:

- Exposure to any light source for 5 to 10 minutes charges the technology for up to 8 hours. No external power source needed. The glow will start bright and gradually fade.
- Dakota VizLite DT garments meet CSA Z96 high-visibility safety standards.
