SANITIZER

Hygiene

Proper hygiene can help reduce the risk of infection or spreading infection to others:

Wash your hands often with soap and water for at least 20 seconds, especially after using the washroom and when preparing food.

Use alcohol-based hand sanitizer if soap and water are not available.

When coughing or sneezing: cough or sneeze into a tissue or the bend of your arm, not your hand.

Dispose of any tissues you have used as soon as possible in a lined waste basket and wash your hands afterwards.

Avoid touching your eyes, nose, or mouth with unwashed hands.

CLEAR GEL HAND SANITIZER DISPENSER

4 / box.

70% ethyl alcohol

SURFACE SANITIZER

Style: P1326913

Kills bacteria and harmful germs.
4 4L units / box.

70% ethyl alcohol

CORONAVIRUSES ON SURFACES

It is not certain how long COVID-19 survives on surfaces, but it seems to behave like other coronaviruses. Preliminary information on COVID-19 suggests that the virus may persist on surfaces for a few hours or up to several days depending on different conditions, such as: temperature, type of surface, and humidity of the environment.

Surfaces frequently touched with hands are most likely to be contaminated, including tables, handrails, doorknobs, electronics, countertops, light switches, faucet handles, cabinet handles, and elevator buttons.

Products shipped within or from outside of Canada could also be contaminated. However, because parcels generally take days or weeks to be delivered, and are shipped at room temperature, the risk of spread is low. There is no known risk of coronaviruses entering Canada on parcels or packages.

SANITIZER

FOR ALL EMPLOYEES

All employees should ensure they understand and comply with the infection prevention policies and practices in place in their workplaces.

Keep your hands clean

Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.

Avoid touching your eyes, nose & mouth.

Cough or sneeze into the bend of your arm.

Avoid touching surfaces people touch often. Instead of a handshake, give a friendly wave or elbow bump.

Use any necessary personal protective equipment, as directed.

Keep your environment clean

Use appropriate products to clean and disinfect items like your desk, work surface, phones, keyboards and electronics, cash registers, keypads, elevator buttons, customer service counters and restaurant tables more often, especially when visibly dirty.

If they can withstand the use of liquids for disinfection, frequently touched electronics such as phones, computers and other devices may be disinfected with 70% alcohol (e.g. alcohol prep wipes).

FOR ALL EMPLOYEES

Keep a distance of 2 metres between you, your coworkers, and customers. Increase distance between desks, tables and workstations.

Reduce activities that require close physical proximity or contact with people, such as team meetings.

Limit any contacts closer than 2 metres to the shortest time possible.

If you have a symptom of COVID-19 if you think you might have COVID-19, use our self-assessment tool to find out what to do.

It is critical that, if you have one symptom of COVID-19 (fever, cough or difficulty breathing), or even mild symptoms, you should stay home to avoid spreading illness to others.

If you develop even mild symptoms while at your workplace, separate yourself from others and go home,

avoiding use of public transit (e.g. buses, train, taxi) if possible.

Contact your local Public Health Authority and follow their advice.

If you are concerned about your financial stability during this time, the Government of Canada is providing assistance.

FACE MASK / SHIELD

APPROPRIATE USE OF NON-MEDICAL MASK OR FACE COVERING

When worn properly, a person wearing a non-medical mask or face covering can reduce the spread of his or her own infectious respiratory droplets.

Non-medical face masks or face coverings should:

- allow for easy breathing.
- fit securely to the head with ties or ear loops
- maintain their shape after washing and drying.
- be changed as soon as possible if damp or dirty.
- be comfortable and not require frequent adjustment.
- be made of at least 2 layers of tightly woven material fabric (such as cotton or linen).
- be large enough to completely and comfortably cover the nose and mouth without gaping.

Non-medical masks or face coverings should not:

- be shared with others.
- impair vision or interfere with tasks.
- be placed on children under the age of 2 years.
- be made of plastic or other non-breathable materials.
- be secured with tape or other inappropriate materials.
- be made exclusively of materials that easily fall apart, such as tissues.
- be placed on anyone unable to remove them without assistance or anyone who has trouble breathing.

FACE MASK WITH VENT

Style: CSTFACMSKFLTR

- Durable poly/cotton outer fabric. Inside cotton for comfort.
- Ventilation hole for additional comfort and breathability.
- Washable and reusable.
- Machine or hand wash in cold water, normal dryer temperature.
- Recommend wash before use.

25 masks /box.

(This mask is not a respirator and is not certified for medical use. Given the personal nature of this product, we cannot offer any returns or exchanges.)

REUSEABLE FULL FACE SHIELD

Style: L600

- Polyurethane forehead band for increased comfort for extended wear.
- Headpiece increases distance between face to lens to accommodate glasses, goggles and surgical masks (including N95).
- Back stretch strap for comfortable fitting.
- Optically clear and distortion-free vision.

One size. 100 shields /box.
