How soon will I get my order?

It's a good question and one we hear all the time.

By purchasing "core" items, it enables us to fill your order faster since you are purchasing items that have ample stock and the supply is good.

Mark's Commercial has two levels of available "core" stock, which is from internal and external inventories. FC Core styles are our own brands and carried within internal distribution centres with an estimated general shipping time of 3-5 business days.

Your order is coming your way!

VizLite® DT
DUAL TECHNOLOGY

the difference is like day & **VizLite™**

With the long winter nights soon approaching, it's important that workers be easily seen both day and night. Wearing industrial workwear using VizLite™ Dual Technology is a smart choice because it combines phosphorescent and reflective technologies to let you be seen at greater distances than using traditional high visibility garments.

VizLite™ Dual Technology phosphorescence offers a third level of protection, when there is low light or no light, by giving off an intense glow for up to 8 hours, without the use of batteries. VizLite™ Dual Technology phosphorescence is charged by ultraviolet light after five to ten minutes of exposure.

There is a range of VizLite™ Dual Technology products to meet the needs of the global safety market.

VizLite™ DT
Domestic wash phosphorescent material
 VizLite® reflective tapes (10mm and 50mm width) are stitchable and suitable for mid weight and heavy weight fabrics. The DT material is suitable for embroidering and screen printing to produce identity badges and logos.

VizLite™ DT HA
Heat applied phosphorescent film
 VizLite® DT HA is a phosphorescent and reflective heat applied film incorporating a layer of microscopic phosphorescent technology glass beads that offers an innovative solution to garment branding.

VizLite™ DT 7050
Polycotton based phosphorescent material with reflective tape
 VizLite® DT 7050 tapes are certified to meet the EN 20471:2013, ANSI 107:2010 and can be used as retro-reflective material on garments which are to be certified to those standards.

Certified to meet and exceed global standards including the areas of Photo Luminescence, FR Protection, Antistatic, Arc Protection, ANSI 107 and ISO20471 High Visibility, Oeko-Tex with testing undertaken at SATRA, BTTC, ArcWear, UL, Centrocot, VTEC Laboratories Inc. and Shirley Technologies. Compliant with CSA Z96-15 Class 1 & 2, Level 2. BC MOT Safety Apparel.

OUR MISSION

It is our mission to work with forward-thinking organizations to keep Canadian workers warmer, drier, safer and more comfortable. We do so through the use of leading-edge technology and innovation, that will contribute to an incident-free future and the ultimate goal of bringing workers home safe...every single day.

Innovations Explained

RAIN DEFENDER®

Amazingly durable and dependably water repellent, moisture beads up and rolls off. Rain Defender® Durable Water Repellent.

FULL SWING®

Looks traditional, feels exceptional. Engineered design provides stretch without bulk and every element works with you so you can work easier. Classic Carhartt engineered for maximum range of motion.

RUGGED FLEX®

Is gear that is made to move in, so whatever you're doing, it's easier to do. Rugged Flex® is stretch technology that's made for ease of movement. The Rugged Flex® designation is given to materials that meet Carhartt's defined standards for stretch and recovery.

STORM DEFENDER®

Gear with a waterproof, breathable membrane and waterproof seams. Storm Defender® Waterproof Breathable protection.

HYPER-DRI HD3®

Waterproof & breathable – Our best water protection. A waterproof barrier is laminated to the underside of the outer fabric and a durable water repellent (DWR) treatment is applied on the outside of our casual and industrial clothing and accessories. Waterproof zippers and all seams are sealed to keep you and your valuables dry.

T-MAX®

Maximum warmth and superior comfort. T-MAX® insulation is a lightweight insulation in our clothing, shoes, boots and accessories that provides warmth without the bulk and allows moisture to move away from the body to help regulate your body temperature. Keeping you warm, dry and comfortable.

FLEXTECH®

Specialty fabric with excellent stretch and long-lasting shape, ensuring that our casual and industrial clothing feels comfortable and will retain its shape throughout its lifetime. Our FLEXTECH® WAISTBAND in men's pants is an integrated elastic that allows the waistband to expand as needed, providing a custom and comfortable fit.

STAIN REJECTOR®

STAIN REJECTOR® fabrics are used in our men's pants to repel liquid so spills instantly bead up and wipe off without leaving a mark.

MIMIX®

Utilize a patented, science-based design featuring lightweight stretch panels that improve overall mobility and increase breathability for all-day comfort.

TOUCH-TEX™

Superior color retention, soil release and wickability. TOUCH-TEX PRO™ has the same features as Touchtex™ but with an even softer hand.

HELLY TECH® FABRIC

Helly Tech® is constructed with Polymer Polyurethane (PU) based membranes and coating technologies. The PU membrane gives softness and stretch to the fabric, while the coating allows waterproofness and breathable qualities. Helly Tech® is made either with Hydrophilic barrier membranes or Microporous membranes, depending on the end-use purpose of the fabric.

LIFALOFT™

Developed in cooperation with Primaloft®, LIFALOFT™ is a combination of LIFA®'s unique insulation structure and Primaloft®'s extensive knowledge in synthetic insulation.

With increased warmth, lightweight insulation and superior moisture management properties. LIFALOFT™ technology is an insulation revolution that will keep you warmer with less weight and bulk compared to traditional polyester insulation.

PRIMALOFT™

Primaloft® is a synthetic insulation technology, offering superior thermal properties with excellent water repellency. It is made up of ultra-fine fibers that form air pockets to trap heat inside. Additional feature of the ultra-fine fiber is super softness.

CORDURA®

Designed for living and built to last, the original durable CORDURA® fabric that has excellent resistance to abrasion and excellent tear strength, has proven performance in many of the world's toughest environments. Made with 100% high tenacity air jet textured nylon 6,6 filament yarns in a range of sizes.

RIPSTOP

Ripstop fabrics are woven fabrics, often made of nylon, using a special reinforcing technique that makes them resistant to tearing and ripping. During weaving, (thick) reinforcement yarns are interwoven at regular intervals in a crosshatch pattern. Thin and lightweight ripstop fabrics have a 2-dimensional structure due to the thicker yarns being interwoven in thinner cloth. Advantages of ripstop are the favourable strength-to-weight ratio and that small tears can not easily spread.
